SOEN Sound & Design in Concert

SOEN is the leading innovator of miniaturized high-performance audio solutions. Based in California, the company provides the most compact and elegant audio products including portable speakers and soundbars. SOEN was founded by industry leading designers, engineers and craftsmen brought together by their passions to create the world's finest audio products.

The recent advents in digital music and the miniaturization of electronics had mobilized personal entertainment. But SOEN founders felt the existing audio technologies were failing to provide good sound from smaller form factors. The design and quality of most incumbent products was also un-inspiring and clutter-some. Inspired by music and driven for perfection, the SOEN team embarked on a mission to enrich lives with superior technologies and best-in-class products.

SOEN audio wizards have developed cutting-edge technologies that deliver stunning sound from amazingly small spaces. This miniaturization of high-performance enables the SOEN designers to create beautiful and intelligent products. SOEN products with a magical synthesis of design and performance provide an unparalleled immersive experience.

SOEN Premium Sound

Advanced Technologies for Enhanced Entertainment

SOEN audio technologies empower space constrained consumer electronic devices including tablets, computers and TVs with best-in-class sound. SOEN Premium Sound systems employ multiple unique and groundbreaking audio technologies to provide an immersive experience for movie watching or music listening. These premium audio systems deliver vibrant, fuller and richer sound.
